Tips to Save Money on Medications

Review Medications Every Six Months

Eliminate unnecessary drugs (and lower your risk of side effects and drug interactions) by reviewing medications with your physician or pharmacist.

Talk with Your Doctor about Cost

Let your doctor know that cost and therapeutic effectiveness both matter. Ask if there is a generic or lower-cost substitute available.

Shop around and Compare Prices

Compare supermarket pharmacies, chain pharmacies, independent pharmacies, and Sav-Rx mail order pharmacy.

Avoid Free Samples of Medications

Free samples are usually brand name and more expensive in the long run.

Ask a Pharmacist for Guidance

Pharmacists can be helpful in guiding you and identifying other options if you are unable to afford your medications.

Sav-Rx Mail Order Pharmacy for Long-Term Medications

You can receive 90-day supplies of maintenance medications through the Sav-Rx Mail Order Pharmacy at a more cost-effective copay than at a retail pharmacy.

Ask for Smaller Quantities of New Medications

Consider asking your doctor for a smaller quantity of a new medication until you know it is right for you. This is especially helpful if you are paying cash or have a high copay.
